Allaboutcows

AAC +Korn

Healthy and protein-enriched feed for your dairy cows

AAC +Korn is an energy-rich and economical feed solution for dairy cows, heifers and calves.

Binds 4% crude protein in grain, peas, fava beans and corn
Reduces the need for purchased protein.

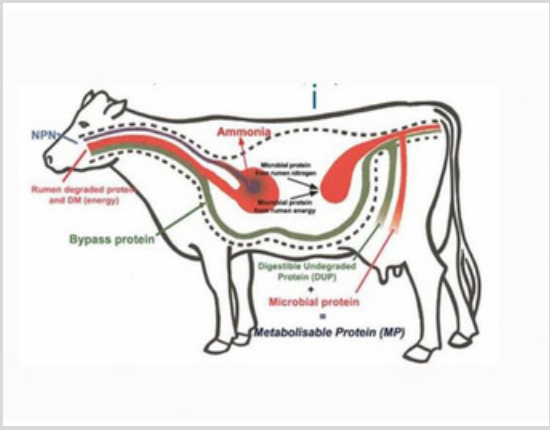
Functions as a rumen buffer
High pH helps prevent the occurrence of rumen acidosis.

Reduction of rumen acidosis
Improves feed efficiency.

AAC+Korn is easy to store with good hygiene
Simple and effective storage for up to one year.

AAC+Korn - composition as produced:

Feead barley	95,0 %
Urea	1,5 %
Enzymes	0,5 %
Water	6,0 %



In AAC+Korn, urea is converted into ammonia.

Enzymes convert urea into ammonia.

Ammonia breaks down lignin bonds in grain fibre, releasing otherwise indigestible energy and increasing the amount of useful energy in the grain.

Ammonia reacts with CO_2 and water in the air and is converted into ammonium carbonate.

Ammonia = rumen protein!

Carbonate = increased pH and rumen boost!

	AAC +Korn
More energy	**YES**
Addition of protein	**YES**
Rumen buffer	**YES**
Easy storage	**YES**
Ready for feeding from storage	**YES**
Maximum grain yield	**YES**
Maximum starch yield	**YES**
Home-mixed feed / locally dried feed	**YES**
