AAC Solid Milk

Milk replacer for calves

AAC Solid Milk is available in two variants, giving you the opportunity to find the most suitable solution for your farm. Both variants can be fed on their own, without adding whole milk, or used as a supplement mixed with your own milk.

AAC Solid Milk contains:

- 50% natural vitamin E for an optimal immune system
- Aroma and flavouring agents for optimal feed intake
- Organic acids for an optimal gut flora
- Probiotics for stable digestion
- Special fat composition for the best possible digestion and utilisation

Pack size

- AAC Solid Milk is sold in 25 kg bags.

Feeding instructions

- Mix 140–160 g of milk replacer with 0.9 litres of water.
- During the winter period in cold weather, the milk powder allowance can be increased by up to 10%.
- Mix AAC Solid Milk with water at 45°C and feed at 40°C.
- Feed 6–8 litres of prepared milk replacer daily.

Storage

- Store in a cool and dry place.
